

## Technical Tip 30

### Editing and customize the messages of the language file.

At the installation the Dutch, German and English language file is installed in SMS comfort. Default the English file is used if no other language file is selected at the setup.

You can edit the message.xml file with a XML editor.

*Free XML tool : Microsoft [XML Notepad 2007](#)*

The **message.xml** file is **loaded at startup** of the service.

- To **manually change language file** stop service, delete message.xml and copy one of the three language files and rename to message.xml and restart service.
- If you like to **customize** your messages file stop service, edit message.xml, save XML and restart service.
- **Create your own language file.** Stop service, edit message.xml, save XML and restart service

Default files installed in C:\Program Files\Sonal\SMS comfort\config

- messagesNL.xml
- messagesDE.xml
- messagesEN.xml

XML Notepad - C:\Program Files\Sonal\SMS comfort\config\messagesEN.xml

File Edit View Insert Window Help

C:\Program Files\Sonal\SMS comfort\config\messagesEN.xml

Tree View XSL Output
