

## Technical Tip 36

### Batch file command line utility and SMS Integration.

**Blat is a freeware command line utility** for sending emails over SMTP.

With this tool you can easily integrate SMS notification in your batch file. Sending directly sms messages to SMS comfort or over the mail server, depending the required setup.

#### ***Preparing: SMScomfort and Blat***

- Install SMS comfort.
- Copy blat folder in root
- Working directory will be: **C:\blat262\full\**

Batch file Example:

```
;@echo off
:::::::::::::: Lets set some variables :::::::::::::::
set SMS=MobileNR
set smsdomain=@sms.domain
set email=name@domain.com
set From=name@domain.com
set server=192.168.1.1
set subj=Test subject 262
set Body=Test body 262
set File=blat.log
:::::::::::::: Now we run Blat! :::::::::::::::
```

```
C:\blat262\full\blat.exe -subject "%subj%" -body "%Body%" -to
%sms%%smsdomain%,%email% -f %From% -server %server% -attach %File%
```

Download Blat from <http://www.blat.net>
