

SMS Comfort application registration

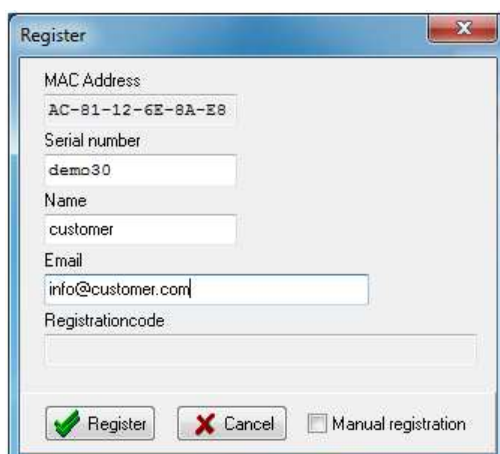

After installation of SMS Comfort the software runs fully operational in demo mode for 30 days valid for 2 users and 1 COM port.

Registering SMS Comfort to get a fully working application can be done over the internet by following next steps:

In "SMS Comfort configuration" go to the tab page "Licence"

Click on the button "Register" and the next window appears:

Fill in all fields:

MAC address	This field is already filled in automatically and contains the unique MAC address of the network card.
Serial number	Fill in the license key which is mentioned in the DVD box of SMS Comfort.
Name	Fill in your company name
Email	Fill in your email address

After filling in all fields click on the button “Register” to automatically register the software on the SMS Comfort license server (internet connection required).

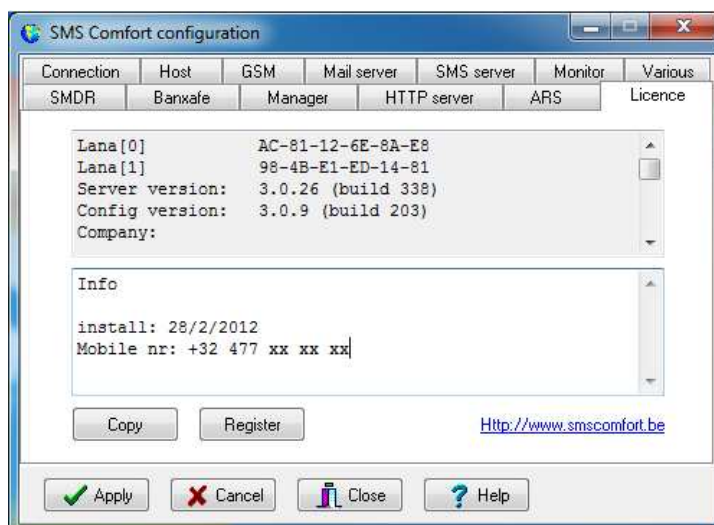

After a successful online registration the field on the bottom of the window will contain a valid registration code.

If you get an error message while trying to register the software online it’s possible that the network traffic is blocked by a firewall or other security settings. In this case register SMS Comfort manually by following the procedure underneath.

Manual registration

The license key can also be obtained by email if the online registration fails. Please send a license request email to following address: license@smscomfort.be containing all information mentioned on the License tab page.

All license details can be copied to the clipboard by clicking the “Copy” button on the “License” tab page.

In reply to your license request you'll receive an email (next business day) with a registration code that needs to be entered in the field "Registration code". Check the box "Manual registration".
