

SMS comfort

Technical Tip 3

SMS Alerting messages from remote devices to a mobile

If the setup is correct you can send SMS Alerting messages from remote devices to a mobile. The delivery notification from the network / mobile will be sent to the reply mail address for extra info and supervision. (support email address)

Setup overview :

To make it possible to send SMS from remote devices.

Setup remote device.

TO: mobilenumber@sms-domain
FROM: it@mail-domain
MAILSERVER: public IP (Site with SMS comfort)
SMTP Port: 33325

Firewall NAT setup:

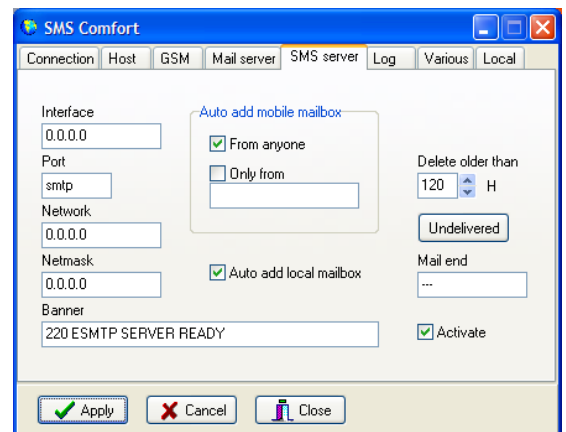

NAT Port redirection *any public IP:33325 to IP SMS comfort:25*

SMS comfort Setup:

SMS Server settings:

Allow all IP's to send SMS
Interface : 0.0.0.0 (all interfaces)
Network: 0.0.0.0 (all ip addresses)
Netmask: 0.0.0.0. (all subnets)

Deactivate "auto add local mailbox" and
"Add mobile mailbox"

Add mobile and email accounts manually.
