

Technical Tip 6

Changing default timers and limits to a higher setting.

All timers and limits can be changed to a higher setting if needed in a plain text editor. First stop the SMS comfort service and close the configuration tool.

If a timer or limit is set to a higher setting than the default, this new setting will be the maximum limit after restarting the service.

To change settings, open the XML file in **C:\Program Files\Sonal\Sms Comfort\config** with Notepad or another text editor.

various_cfg.xml

```
<Various type="TVarious">
  <BackupLogFile>True</BackupLogFile>
  <Console>False</Console>
  <DaysLeft>0</DaysLeft>
  <DefaultCountry>32</DefaultCountry>
  <Demo>False</Demo>
  <Info>Info</Info>
  <MaxEmailClients>65535</MaxEmailClients>
  <MaxLenBody>459</MaxLenBody> max default: 2448 ( equal to 16 sms)
  <MaxComPorts>4</MaxComPorts>
  <MaxLenLog>2</MaxLenLog> max default: 20 MB
  <TrayIcon>True</TrayIcon>
  <Version>1.0.60 (build 126)</Version>
